## Installation Manual (Translated by HiModel)

1. Insert the software CD-rom, and install file dotnetfx dotnetfx, (skip this step if already

installed), then install file VRC\_software\_v3 you can choose the installation location as you wish. Do not run the game at this moment! (not ready to run yet ^\_^)

2. Run the file on the CD 件.exe , the path (installation location) must be exactly same to the previous one which you selected when install the file dotnetfx on step 1.

- 3. After the 2 steps, you can run the game by double click the icon on your desktop of your computer.
- 4. If there is error message reminding scripts error, click YES, remember to connect your simulator and switch before the game, choose icon it on run
